

PROJECT FACT SHEET

Customer: TAGARA GROUP

Project: BIANCO DEVELOPMENT STAGE 1

Project Profile: This project involved the supply and installation of Electrical, Communications and a fully integrated security and C-Bus System.

Outline of NILSEN Scope of Works:

- Supply and install of LV reticulation including Main Switchboard and numerous Distribution Boards.
- Supply and install of Main Communications Room fibre backbone and all end user points.
- Supply and install of a C-Bus Lighting System integrated with a security system enabling both systems to communication to each other.

Specific Project Obstacles To Be Overcome:

This project required a high degree of coordination to enable the Bianco Hire Services to begin operations while the structural steel buildings were under construction. The main communication room was housed in the structural steel offices, which required Nilsen to plan forward to achieve this goal.

NILSEN Innovations:

- Delivery of part project for client use, while completing the other sections
- Delivering a client driven integrated lighting and security system by involving the end user in the construction process
