

### PROJECT FACT SHEET

**Customer:** Sir Samuel Mines (Jubilee Mining NL)

**Project:** Cosmos Nickel Mine

**Project Profile:** Located in the Northern Goldfields of Western Australia near Leinster the Cosmos Nickel Mine project includes:

- High Voltage infrastructure upgrade
- Installation of 14x transformers
- Installation of approximately 10km of HV (High Voltage) cable (11kV and 33kV) inclusive of about 65 High Voltage termination/joints
- Associated cable support systems

There are 2x cable lowering activities to be undertaken in early 2008 which will involve the lowering of 450-500 metres of HV (High Voltage) cable from bore holes at the surface to the mine workings.

Connected to the past, transforming the future
