

PROJECT FACT SHEET

Customer: Doric Construction

Project: Curtin University of Technology - Events Centre

Project Profile:

Work commenced on the Events Centre in Sept 2007 and was completed in April 2009.

The centre has a large volume sports hall with three multipurpose courts, two gymnasiums, a large fitness aerobics studio, spin room, change rooms, café and admin area. The stadium covers 5000sqm. Externally there is a beach volleyball court, maintenance compound and ground staff facilities.

A key feature of the works was the motorized, retractable tiered seating system for 2000 people.

Nilsen were engaged to carry out the electrical services inclusive of the complex A/V system, access control and communications for the stadium. The builder has submitted the project for the Master Builder awards this year.

Connected to the past, transforming the future
