

PROJECT FACT SHEET

Customer: Federation Centres

Project: Warwick Grove Shopping Centre Transformer Replacement

Project Profile: Warwick Grove Shopping Centre has a convenience based retail mix including a including a large range of fresh food and service providers and a six-screen cinema complex.

Nilsen were engaged for the replacement of 3 transformers and to upgrade the ventilation within two high voltage transformer rooms.

The removal of these transformers posed some major challenges due to their location, including one which was located in a basement carpark with no crane or forklift access.

Engaging a team of 4 highly specialised staff to perform the transformer upgrade, Nilsen successfully completed the works in July 2014 with no interruption to vendors and customers.
