

PROJECT FACT SHEET

Customer: Brookfield Multiplex for St John of God

Project: Midland Public and Private Hospitals

Project Profile: Brookfield Multiplex selected Nilsen to carry out all electrical works at the new state of the art Midland Health Campus.

The new Midland Health Campus delivers free care to the people of Perth's north-eastern corridor and the Wheatbelt from late 2015. It is the first new hospital in the area in more than 50 years.

Nilsen supplied and installed the LV electrical, HV infrastructure, temporary power, IT and communication systems for this prestigious project. The scope of the electrical works includes LV switchboards, UPS systems, distribution and reticulation, emergency generators, lightning protection, medical earthing and leakage protection as well intelligent lighting control. Nilsen also installed the ELVS system including Nurse Call, access control, IPTV patient entertainment system, duress and paging, IT and communications.

This project was completed in July 2015.
