

PROJECT FACT SHEET

Customer: WATPAC CONSTRUCTION (QLD) PTY LTD

Project: QEII HOSPITAL - ELECTIVE SURGERY EXPANSION

Project Profile: Nilsen recently installed a New Main Switchboard and 900 kVa Caterpillar Generator at Queen Elizabeth 2nd Hospital in Brisbane. This install was done over approx 6 months during several over night and weekend shutdowns of various sections of the Hospital. At no time was there any incidents causing unexpected disruption to the hospital departments. Images 160185 and 260123

At the same Nilsen completed the following works within the hospital.

- 1) Refurbishment of Outpatient Department in two stages to allow them to function while works were in progress.
- 2) Refurbishment of Day Surgery department including 1 new Operating Theatre. All this occurred while 6 existing theatres were kept operational at all times.
- 3) Replacement of distribution boards in all wards along with upgrading the bed head power.
- 4) Installation of a STANILITE wireless emergency lighting system through the entire hospital and decommissioning of the existing 110volt system.
