

PROJECT FACT SHEET

Customer: Esslemont Building and Civil

Project: Rockingham Hospital Phase 3

Project Profile: Rockingham Hospital Phase 3 is a stand-alone acute mental health unit. Comprising 5 separate wards, each incorporating specific isolation rooms, aged care rooms and disabled care units.

Nilsen's contracting team were contracting to provide the new building main switchboard, general lighting and power, MATV, EWIS, fire detection, Nurse Call, mobile duress alarm system, security system, voice and data and fibre optic systems.

The specifics of this project pose some very unique challenges to Nilsen and its subcontractors in the area of security, patient and staff safety.

This project was completed in 2009
