

PROJECT FACT SHEET

Customer: SCENTRE GROUP (WESTFIELD D&C)

Project: Westfield North Lakes: Link Mall

Project Profile: Nilsen QLD's recurrent customer Westfield will spend \$140M on an extension to link their North Lakes Shopping Centre with the new Ikea store being built behind the shopping centre.

This major announcement came on the eve of Westfield North Lakes unveiling its Fresh Food marketplace and dining area which Nilsen also completed for the retail giant.

Nilsen QLD were awarded the Developed Design & Construction of the Low Voltage Electrical and Lighting Systems portion of the Link Mall works

late last year with preliminary works commencing on site last month. The new Link Mall will feature over 60 stores including various Mini Majors as well as Specialities Tenancies. A Westfield spokeswoman has said the new section of the centre will have a "Queensland outdoors" feel about it.

Nilsen's scope includes:

- **Design assessment to reduce / eliminate impacts of EMF from Low Voltage Infrastructure**
- **Complete low voltage installation for lighting and power**
- **Consumers mains, cabling and cable support**
- **Proprietary switchboard assemblies**
- **Generating set/ Standby power supply system, fuel tanks and fuel transfer systems**
- **Supply and install proprietary luminaires complete with lighting control equipment**
- **PA system**
- **Listening System (AFILS)**
- **Traffic Counter System**
- **MATV / Television System**
- **Lightning Protection system**

Installation at the Link Mall site is set to commence early March 2016 with the basebuild complete by late September 2016. The Link Mall project will surely
