

PROJECT FACT SHEET

Customer: Westfield

Project: Westfield Hornsby Restaurant Precinct

Project Profile:

Nilsen recently completed the electrical services on the Westfield Hornsby Restaurant Precinct. This included the supply and installation of specialty lighting, lighting control and general power.

The work was completed over 12 weeks at night to ensure that trading was not affected in any way.

This upgrade represents a significant shift in the appearance of shopping centre food courts as our client works towards a new dining experience within their centres.

- **Completion Date:** April 2014
- **Man Hours:** 1 020
- **LTI's:** Zero
