

PROJECT FACT SHEET

Customer: Renascent

Project: QBE

Project Profile:

Nilsen was contracted by Renascent to carry out the complete electrical installation for QBE. The project comprises the fit out of Levels 1-9/ 60 Station Street Parramatta for QBE Insurance. The building has recently been constructed and QBE will be the first tenant to occupy these floors. The base building works were carried out by Nilsen.

New electrical services include the removal of redundant cabling and equipment; installation of lighting and power, modifications to existing Electrical Switchboards, installation of UPS System, C-Bus lighting control systems, and Energy Monitoring System, individually monitoring both lighting and power. As well as associated Cable trays and catenary systems throughout. Modifications to base building lighting to include for DSI lighting controls
