

## PROJECT FACT SHEET

**Customer:** John Holland

**Project:** Sydney Light Rail Inner West Extension

### Project Profile:

Nilsen was contracted by John Holland to carry out the complete electrical installation for the latest extension and upgrade to the control centre to the Sydney Light Rail Line in Pyrmont. The Inner West Light Rail Extension will: improve access to public transport and connections between where people live, work and visit; provide new connections to surrounding shopping and entertainment districts such as the Sydney Fish Markets, Star City, Paddy's Markets, Capitol Square and Leichardt Marketplace; allow passengers to easily change between light rail, bus and bicycle, as well as trains at Lewisham and Dulwich Hill; enhance local access and amenity along the disused freight rail corridor; encourage sustainable and healthy travel options.

Nilsen's scope of works include: the supply and install of electrical fire and communications services to the Pyrmont depot building extension as well as all labour, plant, equipment and materials necessary to complete the electrical services installation which form part of the Pyrmont Depot. All of this must be completed with minimal disruption due to the light rail facility still being fully operational.
