

## PROJECT FACT SHEET

**Customer:** City of Dandenong

**Contractor:** Civilscape / Hayes Heffer

**Project:** Revitalisation of City St / Dandenong Plaza

**Completion:** November 2012

**Project Profile:** Revitalisation of City St Dandenong creating a new open air public area designed for multiple uses.

**Nilsen Scope of Works:** Nilsen sourced supplies and installed public lighting, remote controlled LED colour shifting feature lighting, erected a 28 meter light tower with Mirrortec reflector system and 5Kw flood lights, under deck feature lighting, handrail feature lighting and power throughout the project. The lighting was controlled from a remote location out of the City of Dandenong's Arts control centre using Dali lighting controls via 3G communications.

**Project Challenges:** Tight budget restraints, a timeframe of materials taking into account overseas sources and creating systems for the installation of novel, custom built equipment all made for very demanding project.

**Added value accrued to customer because of Nilsen involvement:** Nilsen redesigned the project after consultation with the client whose design far exceeded the actual requirements thus significantly affecting the scope of the project
