Nilsen Scope of Works:

- Fit out of 4 levels for channel 9 staff including work stations, offices, meeting rooms, control desk, studios, news room, breakout areas
- Channel 9 Data hall installation
- Communications Rooms
- Mains cable reticulation
- Generator and UPS system via ASCO switch to Studios, news room, control room and other essential services
- New channel 9 MSB in basement of building with new metering
- Scada control and monitoring of all services including Generator, UPS, ASCO Switches, static switches, status of essential services

Project Challenges:

- 15 week program to achieve practical completion
- Managing procurement in a limited amount of time
- Managing up to 60 electricians in such a busy work environment
- Coordinating with other trades
- Creating a safe work environment with so many tradesmen on the project

PROJECT FACT SHEET

Added value accrued to customer because of Nilsen involvement:

APM at tender time opted to engage Nilsen to undertake these works due to their confidence in Nilsen's capability to deliver the project on time. Nilsen delivered a quality project in a short program which allowed a smooth transition for channel 9 from Bendigo St to 717 Bourke St.

The completion of this project on time was crucial as channel had no option but to vacate Bendigo St by a certain date.

Referees:

Jason Rodgers – APM Site Manager

Geoff Dart – APM Project Manager

Geoff Osborne – Channel 9 Engineering Manager
