Project:

Prince Charles Hospital: Pediatric Upgrade & Triage Refurbishment

Project Profile:

In August 2011 Nilsen were awarded the Electrical Package for the upgrade to the Paediatrics Wing at **Prince Charles Hospital**. The project, located just outside of Brisbane's CBD in Chermside, was run by managing contractor Baulderstone.

Construction of the new Pediatrics Wing included a new Emergency Area, Imaging Facility, 30-bed Short Stay Area, Education Facility and refurbishment of the existing Triage.

Specific work carried out by Nilsen included:

- 2 x Diesel Fuel Tanks
- New Main Switchboard
- General Light and Power
- Nurse Call System
- Security System
- UPS System

During the project, Nilsen successfully adhered to Baulderstone's '10% Apprentice and Upskilling Policy'.

The project was completed in August 2012, adding another Queensland Health Hospital to Nilsen's expanding list of Health Sector expertise.
