

PROJECT FACT SHEET

Customer: WESTFIELD DESIGN & CONSTRUCTION

Project: Westfield Mt Gravatt: MYER Store

Project Profile:

Westfield Garden City at Mt Gravatt on Brisbane's south-side is in the process of a mammoth makeover that will add 100 new speciality shops and increase retail space by 40,000m².

The redevelopment also includes a new Myer department store, to which Nilsen were awarded the Electrical contract.

Work began on the overall project in June 2013, with the project to conclude in the final quarter of 2014. Due to the tight time frame the project has been divided into five separate packages, each awarded to a different contractor.

Nilsen's Myer scope includes:

- Main Switchboard and Distribution Boards
- Associated Sub-mains and Sub-circuits
- General Power
- Emergency and Exit Lighting
- Cable Management System

Situated in a major commercial centre at one of the city's busiest transport hubs, Westfield Garden City has one of the largest trade areas among Westfield centres in Australia.

The project team is on track for successful completion of the Myer store in August 2014, with related works on site also in the pipeline.
