

## PROJECT FACT SHEET

**Customer:** State of Victoria

---

**Contractor:** Abigroup

---

**Project:** Build 27Km's of freeway linking the Mornington Peninsula

---

**Completion:** Early 2013

---

**Project Profile:**

- 27 kilometres of freeway standard road
- two traffic lanes in each direction
- on and off ramps to 11 roads including three freeway to freeway connections
- 28 bridges (45 separate structures)
- 1.7 million trees, plants and shrubs
- 25 kilometre shared walking and cycling path
- new wetlands to treat water from the roadway prior to release to waterways
- wildlife underpasses, revegetation works and creek improvements in the Pines Flora and Fauna Reserve

**Nilsen Scope of Works:** Supply, install, test and commission

**Project Challenges:** Tight deadlines, working in with staged construction of bridges and roads, traffic management, builders project managers not familiar with the requirements of Vic Roads in regards to traffic signals

**Added value accrued to customer because of Nilsen involvement:** Working in with the builder's project managers we advised them when certain stages needed to be completed for the underground electrical reticulation saving them time and money, redoing civil works due to services being installed after they had finished sections of the project.
