

PROJECT FACT SHEET

Customer: BGC Constructions Pty Ltd

Project: Perth Arena

Project Profile: The State Government is making decisions for the future and is building a state-of-the-art, multipurpose indoor sports and entertainment centre for all West Australians.

The Perth Arena will seat a minimum of 12,000 people for sporting events and 14,000 for concerts, giving international sporting events and performing artists a world class venue.

Replacing the Perth Entertainment Centre and the Burswood Dome, the Perth Arena will incorporate a retractable roof, making the Hopman Cup and even better warm up tournament for the Australian Open.

Other features will include a state-of-the-art operating system to allow maximum flexibility, an adaptable performance floor, extensive support rooms, 40 corporate suites, a 680 bay car park and a forecourt facility, with a big screen similar to Melbourne's Federation Square.
