

PROJECT FACT SHEET

Customer: EMCO

Project: St Mary's Cathedral

Project Profile: "Conserving the Past & Providing for the Future"

The conservation and completion of ST Mary's Cathedral, Perth is an historic project of tremendous significance, not only to the Catholic community but for all Western Australians.

Following decades of planning, consultation, research and organisation, St Mary's Cathedral has re-emerged respectful of its heritage and with the ability to meet the contemporary needs of the Church and the community to faithfully serve generations to follow.

The Bell Tower foundations have been reinforced, crumbling brickwork repaired, electrical wiring replace and care given to all works of art requiring restoration.

Nilsen Pty Ltd provided the expertise to meld old into new.
