

PROJECT FACT SHEET

Customer: John Holland

Project: Eclipse Tower, 60 Station Street, Parramatta

Project Profile:

Nilsen was contracted by John Holland on a D&C basis to carry out the complete design and electrical installation to meet a 5 star Green Star rating and a NABERS Energy 5 star operational rating for the Eclipse Tower. The project includes a two level basement with 150 car parking spaces, ground floor entry, retail unit, plant, substation and loading dock; a nineteen (19) level commercial office tower (The Eclipse Tower) with approximately 25,200m² of NLA, and roof plant with mezzanine area.

Nilsen commenced on site in December 2010 with a completion date of August 2012 on the project.

New electrical services include Main Switchboards, Power Factor Correction, Distribution Switchboards Supply Authority and Green Star Metering, Power Reticulation and General Purpose Power, UPS, Internal and External Lighting, Emergency and Exit Lighting, Backbone voice communications system, Mobile telephone coverage, Free to Air (MATV) and Pay TV Security Access Control System and intruder detection, Intercommunication System, Security CCTV Surveillance System and a Lightning Protection System.
