

PROJECT FACT SHEET

Customer: Built Pty Ltd for Serco, at Fiona Stanley Hospital

Project: FSH Family Birthing Unit

Project Profile: **Project Description**

Demolition and remodeling of the maternity ward, Ward 3D, into a Family Birthing Centre.

Outline of Nilsen Scope of Works

- Demolition
- LV switchboards
- Cable Trays, ducts and conduits
- Sub-circuit cabling
- Accessories, Outlets
- Light Fittings & Emergency Lighting
- Communications Installation, MATV / HDMI
- Assistance Call System
- Testing and Commissioning
- Body Protection Certification

Specific Project Obstacles to overcome

- Construction area within a live hospital, with staff and patients occupying the floors above, below and beside the works. Noise control procedures in place.
- Project started immediately, with limited time for procurement and long lead times on items.

By working collaboratively with the client & Hospital staff, and implementing a detailed Work Plan we ensured critical milestones were achieved with minimal impact to patients.
