

PROJECT FACT SHEET

Customer: John Love Electrical

Project: CASA Brisbane Airport

Project Profile: Located within the Brisbane Airport Precinct, the new CASA building will serve as the Headquarters for civil aviation within the state. Completed late 2008, the facility will accommodate offices and workstations. This site was equipped with the latest Siemon Cat7 cabling to futureproof the site for future cabling upgrades.

Nilsen's role for this project was to supply and install the following:

- Supply and install the latest in Horizontal Cat7 cabling
- Terminate 600 Cat 7 outlets throughout the site
- Supply and Install new communications cabinets to house the new cabling
- Supply and Install Fibre optic infrastructure throughout the complex
- Cat 3 Voice backbone infrastructure throughout the building
- Testing and commissioning activities
