

PROJECT FACT SHEET

Customs: Customs Head Office

Contractor: Baulderstone Pty Ltd

Project: The Electrical & Communication installation required for Customs Head

Office operations

Completion: January 2007

Project Profile: This was an AMP structured cabling solution. Nilsen was the main electrical

contractor on the site as well.

Nilsen Scope of Works:

- Installation of AMP horizontal cabling to over 3500 outlets over 7 floors.
- Installation of AMP backbone cabling (Fibre optics and voice).

Project Challenges: The Customs project was a co-ordination challenge due to the base building works happening at the same time. As well as each floor had an open ceiling so all tray work and conduit works were visible.

Added value accrued to customer because of Nilsen involvement:

Nilsen played a major role in the design process of all the frame and cabinet layouts and positions to help minimise lengths of the network links. AMP certification.
