

### PROJECT FACT SHEET

**Customer:** **AGL Hydro**

**Project:** Macarthur Wind Farm

**Project Profile:** The 420MW Macarthur Wind Farm is currently the largest of its kind in the southern hemisphere and is a joint undertaking between AGL Energy Limited and Meridian Energy Limited. It has been fully operational since late January 2013.

Nilsen are currently undertaking a five year maintenance contract 2013-2018 at Macarthur Wind Farm.

The scope under this contract:

- Service and maintain two 22/132kV transformers and one 132/500kV transformer.
- Service and maintain GIS132kV switchgear.
- Periodic testing of the entire protection scheme.
- Thermal and ultrasonic testing of the Macarthur and Tarrone substations and overhead system.

For further information, please contact Mr Angelo Mifsud of Nilsen (Vic) Pty Ltd on (03) 9450 1300
