

PROJECT FACT SHEET

Customer:

Melbourne Cricket Club

Project:

Electrical Preventative Maintenance of MCG

Project Profile:

Brief Description of This Project:

This maintenance agreement covers all of the MCC's venues – MCG, Punt Road Oval etc. and involves the complete electrical maintenance and operational support for all of the MCG events.

Outline of NILSEN Scope of Works:

- Match day support for all of the events held at the MCG
- Lighting Maintenance
- Uninterruptible Power Supply Maintenance
- High Voltage Asset maintenance
- Switchboard Maintenance – Main & Distribution Boards
- Project installation work
- Statutory Required tests – RCD's / Exit & Emergency Lighting / Test & Tag
- Various other equipment maintenance – Ovens / Microwave ovens / hand dryers
- TEGG Electrical Distribution System Maintenance

Specific Project Obstacles to overcome

- Dealing with multiple stake holders: the MCC, sub-contractors, caterers and the public to ensure the continued safe operation of the MCG during major events such as the Boxing Day test match / AFL grand final etc.

NILSEN Innovations:

- Incorporation of the TEGG maintenance program into the MCG to best protect the MCC's assets and to ensure continued operation of its electrical systems.
- Working with the MCC in a collaborative manner to best serve the facility and customer
