Project:

Jupiters Hotel and Casino: UPS Upgrade

Project Profile:

Gold Coast's Jupiters Hotel and Casino is currently in the process of a mammoth redevelopment, managed internally by Echo Entertainment. Located in Broadbeach on the Gold Coast, major work is set to commence mid-2014 and be finished by 2016, with works at Treasury Casino in Brisbane CBD to commence soon after.

Nilsen were awarded the **Uninterruptable Power Supply (UPS) Upgrade Package at Jupiters Hotel and Casino** with works kicking off in the existing battery room in November 2013.

The scope of work includes:

- *2 x New UPS and associated batteries*
- *New UPS Input / Output Boards*
- *New MIMS Cable*
- *New Chilled Water Air Handling Unit and Exhaust Fan*
- *Removal and disposal of all redundant equipment*
- *Re-configuration of existing sprinkler system*
- *Reconfiguration of existing services*
- *Related building works*

On this project, Nilsen have chosen to use Pyrotenax (also known as Pyro cable) for its' superior fire survival abilities. The cable continues to carry current in extreme temperatures, in excess of 1000°C.

Nilsen are on track for successful completion of the UPS portion of the package in April 2014. We hope this to be the first of several packages awarded to Nilsen relating to these landmark commercial developments in South-East Queensland.
